Gender equality and diversity policy in Koios Care

This Gender Equality Plan (GEP) represents the formal commitment of Koios Care (BV) to fostering a culture of gender equality, diversity, and inclusivity. We believe that diverse teams lead to more innovative solutions and a thriving work environment for everyone.

This plan has been formally adopted by the management of Koios Care and is a strategic document that outlines our objectives, actions, and commitment to allocating the necessary resources for its successful implementation. This GEP will be published on our official company website to ensure transparency and accountability to our employees, partners, and the public.

Koios Care is dedicated towards fostering a culture of gender equality and inclusivity. We believe that diverse teams can only lead to innovative solutions; and as a result, this policy outlines our commitment to achieving gender equality across the different aspects of our company. The founding team of Koios Care has been “raised” in Aristotle University of Thessaloniki (AUTH), a university that strictly believes in diversity and gender equality.

The outline of Koios’ Care gender equality and diversity policy is the following:

1	Ensuring gender equality and diversity
2	Work-life balance for all
3	Commitment to gender-balanced teams
4	Building inclusive projects
5	Monitoring and reporting

Ensuring gender equality and diversity

In recruitment and hiring.

- Partner with groups that support women in STEM to build strong candidate pools for job positions.
- Work with organizations and universities that champion women in science and technology to find talented people to join our team.
- Follow unbiased interview practices and selection criteria to ensure a fair selection process.

Towards bridging the gender pay gap.

- Regularly check salaries to make sure everyone is paid fairly, regardless of gender.
- Offer competitive salaries and benefits that are transparent and consistent across genders.

Work-life balance for all

Flexible work arrangements.

- Recognize the importance of work-life balance and offer flexible work schedules and remote work options to all employees.

Parental leave.

- We provide equitable parental leave policies that allow both mothers and fathers to share childcare responsibilities and maintain career momentum.

Eliminating gender bias.

- We actively discourage work practices that reinforce stereotypes, such as solely assigning administrative tasks to female employees.

Commitment to gender-balanced teams

Set gender balance goals.

- Koios Care is committed to achieving a balanced representation of genders across all departments and leadership positions.

Targeted recruitment.

- Actively seek talented women with relevant skills and experience during the recruitment process.

Building inclusive projects

Needs assessment.

- Design our projects with the needs of all genders in mind.
- Project partners need to follow the same ethical standards when it comes to gender equality and diversity as Koios Care.

Data analysis.

- If use-case appropriate, we analyze data considering gender to find health differences and adjust our projects accordingly.

Inclusive design.

- User testing and project development involve participants of all genders to ensure inclusivity and user-friendliness.

Dedicated Resources for Implementation

To ensure the effective implementation of this GEP, Koios Care commits the following resources.

Human resources: The overall responsibility for this GEP lies with the Koios Care Management Team. The day-to-day coordination, monitoring, and promotion of the plan will be led by the CEO and CTO. All team leads and managers are responsible for implementing the GEP within their respective teams.

Monitoring and reporting

We are committed to continuous improvement. We will monitor progress towards our gender equality goals, refine strategies as needed, and hold regular training sessions on unconscious bias and diversity management. **A zero-tolerance policy** for discrimination or harassment based on gender exists within our organization, and anonymous reporting systems are available for any concerns.

Continuous improvement is central to our approach. To ensure this plan is effective, we commit to the following.

Systematic Data Collection: We will collect, analyze, and monitor sex/gender-disaggregated data for all personnel on an annual basis. This will include data on:

- Proportions of male and female employees across all departments and seniority levels.
- Recruitment and promotion rates by gender.
- The gender pay gap.
- Uptake of parental leave and flexible working arrangements by gender.

Annual Reporting: An annual progress report will be prepared by the responsible lead and presented to the Management Team. A public summary of our progress towards our GEP goals will be published on our website.

Indicators: Progress will be measured against the specific targets and indicators outlined in the action plan below.

By prioritizing gender equality in our staffing and project design, we aim to create a thriving work environment, unlock innovative solutions, and ultimately benefit everyone.

Thematic Areas and Action Plan

Our GEP is structured around five key areas, with specific objectives, actions, targets, and timelines.

Area of Focus	Objective	Specific Actions	Target / Indicator	Timeline
Work-Life Balance and Organisational Culture	To foster a culture that supports a healthy work-life balance for all employees and is free from gender bias.	Recognize the importance of work-life balance and offer flexible work schedules and remote work options. Provide equitable parental leave policies for both parents. Actively discourage work practices that reinforce stereotypes (e.g., solely assigning administrative tasks to female employees).	Annual employee satisfaction survey shows >85% satisfaction with work-life balance policies.100% of parental leave requests approved according to policy.	Ongoing
Gender Balance in Leadership and Decision-Making	To achieve a fair and balanced representation of genders across all departments and in leadership positions.	Set clear goals for gender representation in leadership. Develop mentorship and career development programs to support the progression of	Achieve at least 40% representation of women in leadership and management positions.	By Q4 2027

		women into leadership roles.		
Gender Equality in Recruitment and Career Progression	To ensure our recruitment and promotion processes are fair, unbiased, and attract diverse talent.	Partner with groups that support women in STEM. Follow unbiased interview practices and selection criteria. Regularly check salaries to ensure fair pay, regardless of gender. Offer transparent and competitive salaries and benefits.	Achieve a 50/50 gender balance in candidate pools for all positions. Reduce the company's gender pay gap to less than 5%	By Q4 2027
Integration of the Gender Dimension into Projects	To ensure our project design and development processes are inclusive and consider the needs of all genders.	Design projects with the needs of all genders in mind. Ensure user testing involves participants of all genders. Require project partners to follow the same ethical standards regarding gender equality and diversity.	100% of new projects to include a gender needs assessment at the design phase.	Ongoing
Measures Against Gender-Based Violence, including Sexual Harassment	To maintain a safe and respectful work environment with zero tolerance for harassment and discrimination.	Hold regular, mandatory training sessions on unconscious bias, diversity, and harassment prevention for all staff and decision-makers. Maintain a zero-tolerance policy for discrimination or harassment. Provide a clear, confidential, and anonymous	100% of employees complete annual anti-harassment training. All reported incidents are investigated and resolved according to company policy.	By Q4 2027

		reporting system for any concerns.
